

betaDelta: Confidence Intervals for Standardized Regression Coefficients

Ivan Jacob Agaloos Pesigan

Description

Generates confidence intervals for standardized regression coefficients using delta method standard errors for models fitted by `lm()` as described in Yuan and Chan (2011) and Jones and Waller (2015).

Installation

You can install the released version of **betaDelta** from [GitHub](#) with:

```
install.packages("remotes")  
remotes::install_github("jeksterslab/betaDelta")
```

More Information

See [GitHub Pages](#) for package documentation.
