# betaDelta: Confidence Intervals for Standardized Regression Coefficients

Ivan Jacob Agaloos Pesigan

## Description

Generates confidence intervals for standardized regression coefficients using delta method standard errors for models fitted by lm() as described in Yuan and Chan (2011) and Jones and Waller (2015). A description of the package and code examples are presented in Pesigan et al. (2023).

#### Installation

You can install the CRAN release of betaDelta with:

```
install.packages("betaDelta")
```

You can install the development version of betaDelta from GitHub with:

```
if (!require("remotes")) install.packages("remotes")
remotes::install_github("jeksterslab/betaDelta")
```

#### **More Information**

See GitHub Pages for package documentation.
